PROFILE

A Developer with nearly 4 years of experience in developing Android applications, I am eager to learn new stuff about tech and programming, work as a hard-working team member and aiming to focus on improving my skills in work related fields.

HISTORY

Android/IOS Developer

ENIGMA 2022 Feb - Now

- Collaborating in a **+20 member** team in Scrum method, and **Jira** is our tool to manage the projects.
- My challenge here for me is to develop **Android/IOS** apps with market base options and functionalities, automation (using firebase tools) and also help other team members with less experience to get their tasks done.
- Reach nearly **500,000 Downloads** in app store and google play.
- Tasked to implement a server driven application using **firebase remote config** and **messaging**.
- Develop **+10** applications now available on the **app store** and **google play** which has more than 97% crash-free users.

Android Developer

Qoo Studio 2022 May - 2023 Jan

- Tasked to develop android client side of an application.
- Worked in a professional team and provide **MVVM-clean architecture** in application.

Android Developer

MBL Feb 2022 / Jul 2022

- I tasked to develop a Libgdx Game (for Android and Desktop) which can help patients with mental health issues.
- User controls the character online in the game with a **headset** attached to his head, recording brain signals.

Android Developer

RONIKA Ltd Jun 2021 / Feb 2022

- I tasked to developed android apps which are in IoT industry and user can connect to the sensor (or the device) using Thingspod **IoT platform** (thingspod.com).
- Power Strip : IoT Smart Home-outlet that user can manage. **Clean Architecture** and Repository pattern implemented in development.
- Arooj : **IoT** Building Security application that allows user to control the **security** of building.

SKILLS

- | | | |
|----------------------|------------------|------------------|
| • GIT | • Figma | • Coroutines |
| • Clean Architecture | • Room db | • MVVM |
| • Jetpack | • Google Map SDK | • Kotlin |
| • Retrofit | • Kotlin | • SCRUM |
| • Socket.IO | • Libgdx | • Microsoft Team |
| • Dagger Hilt | • Jira | • UIKit |
| • Swift | • SwiftUI | • ARKit |
| • Swift Combine | | |
